

Oluwadara's Hair Clinic Tips to Successful Hair Growth

- Keep your hair clean! A dirty hair can't grow well because dirt is blocking the pores with growth is meant to occur
- Oil your scalp regularly. A dry scalp means hair filled with dandruff. Get our Hair Oil to keep your scalp properly oiled
- Wear protective hair styles. Cornrows, braids or locs are very good hairstyles to make if you're looking for a fast hair growth
- Don't stress your hair. Yes, we love to style our hair when we make braids or locs, but those styles are actually pulling our hair strands from their roots. You can reduce the amount of times you style your hair
- Your hair is like a garden. Take care of it properly!
- Don't be scared when you're losing a few strands of your hair. The weak ones have to go so that the strong ones can grow there!
